

# OUR FAVOURITE NEW BEAUTY TRICK?

Using different textured foundations to 'dress' your face to suit your look, says **Grace Timothy**

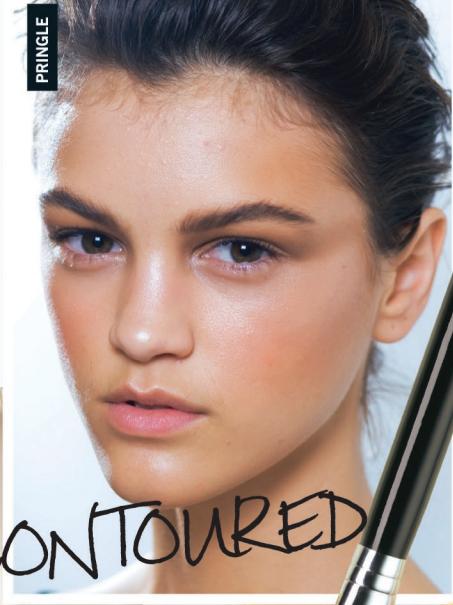

**Cream Colour  
Base in Luna** £13  
Maccosmetics.co.uk

**Skin Rescue Bio-Complex  
Veil SPF15 in Nude** £32  
Jemma Kidd Pro

**HOW TO** "This season it's important to condition the skin to perfection," says Terry Barber, Mac's director of make-up artistry. So, for a dewy sheen, first prep skin using a moisturising primer with a built-in illuminator. Choose a creamy foundation that won't mask your natural radiance, then go for the glow: "For a subtle shimmer, gradually build layers of **Cream Colour Base in Luna**," says Terry. "Apply with your fingertips to the cheeks, forehead and down the top of the nose."

**Dream Creamy  
Foundation in 04  
Light Porcelain**  
£7.99 Maybelline  
New York

**Hydrating  
Foundation  
Primer** £27  
Laura Mercier

**Teint Resist  
Foundation  
in 6** £28  
Yves Saint  
Laurent

**HOW TO** Create a flawless base with a hydrating primer, then apply a long-lasting matte foundation. Sweep a shading powder, like **Diorskin Nude Natural Glow Sculpting Powder**, below the cheekbone and the jaw line, across the forehead towards the temples and down each side of the nose. "Finish by using the pink nude powder to highlight the high points of the face for added radiance," says Jamie Coombes, national make-up artist for Dior. "Lightly brush down the middle of the nose, the browbone and above the cheekbone, blending carefully." ►

**HOW TO** For the glossy look, each product must hydrate. To plump, massage facial oil in a circular motion into clean skin. Then apply a nourishing foundation with a sponge. "Finally, add a silky gleam with an illuminating fluid, like **Soleil Tan de Chanel**," says Chanel Academy make-up artist Matt Wright. "Use your fingertips or a concealer brush to give a kiss of luminosity to the cheekbones, jaw line and collarbone."

Pore Minimizer  
Instant Perfector  
£13 Clinique.co.uk

Compact  
Powder £16  
Ruby & Millie

**HOW TO** First smooth and mattify skin, using Clinique's **Pore Minimizer Instant Perfector**, so your foundation will glide on without leaving excess shine. This season, the matte look isn't a chalky mask, so let your natural radiance show through with a light liquid foundation. "Then use a powder puff to add a little pressed powder all over the face," says celebrity make-up artist Ruby Hammer. "Concentrate on the T-zone. But be light-handed – you don't want to look like a mannequin!" ☺
